

Apple HomePod mini

Artikel	117511
Herstellernummer	MY5H2D/A
EAN	0190199710573
Apple	

Jam-packed with innovation, HomePod mini delivers unexpectedly big sound for a speaker of its size. At just 3.3 inches tall, it takes up almost no space but fills the entire room with rich 360-degree audio that sounds amazing from every angle.

Boundary-pushing computational audio

creates the full, detailed tones of a much larger speaker — and HomePod mini turns it up without missing your voice commands.

HomePod mini is designed to fit anywhere in the house. Its elegant shape is wrapped in a perfectly seamless mesh fabric that's virtually transparent to the sound passing through it. A backlit touch surface on the top provides quick control.

With multiple HomePod mini speakers placed around the house, you can have a connected sound system for your whole home.¹ Ask Siri to play one song everywhere or, just as easily, a different song in each room. And HomePod mini works with HomePod for multiroom audio and features like Intercom.

Stereo pair

If you want to take the amazing sound experience of HomePod mini even further, you can create a stereo pair. Two HomePod mini speakers paired in the same room create left and right channels for an immersive soundstage.

HomePod mini works effortlessly with your Apple devices.

Pick up an incoming call from your iPhone, listen to music on your Mac, or upgrade your TV experience by taking the sound from your Apple TV to the next level — they all connect to HomePod mini.

If you're enjoying music or a podcast and have to head out, you can continue to listen on your iPhone without missing a beat. Hand it off simply by bringing your iPhone close to HomePod mini. And coming soon, you'll experience the feeling of your iPhone and HomePod mini connecting virtually as the sound transfers.²

Hand off music and podcasts between HomePod mini and iPhone

Also coming soon are personalized listening suggestions that will automatically appear on your iPhone when you hold it next to HomePod mini. You'll have instant control at your fingertips without having to unlock your iPhone.

Intelligent assistant

Siri does everything like there's nothing to it.

Siri is your do-it-all intelligent assistant

that puts HomePod mini at the center of your family's activities. Whether you need a hand with a wide variety of everyday tasks, want easy control over your smart home accessories, or simply want to hear your favorite song — just ask Siri.

Siri recognizes you, him, her, and them.

Siri can recognize the voices of up to six different family members on HomePod mini — and create a personalized experience for each person. So the music Dad hears when he asks for something he'd like is totally different from what the kids hear when they ask. And with Personal Requests, Siri can recognize a particular voice and relay that person's information from iPhone apps like Messages,

Calendar, Reminders, and Contacts.

Intercom spreads the word.

With more than one HomePod in the house, you can easily communicate with your family members by voice using Intercom. Ask Siri to send your message to the whole house or to individual rooms — and everyone can easily respond.

Hey Siri, announce, On my way home, want me to pick anything up?

Intercom also works with your other Apple devices so you can send and receive messages through CarPlay while you're driving, on your AirPods during a workout, or with your Apple Watch when you're running errands.

Smart home

Easy to connect. Simple to control.

Whether you already have a smart home or are buying your first smart device, getting set up — and staying connected from anywhere — is a snap with the Home app and HomePod mini.

Private and secure

A speaker that protects your right to privacy.

Privacy is essential — especially in your own home. HomePod mini is designed to keep your personal information safe and be a trusted assistant in your family's everyday life.
