Nothing short of amazing.

Jam-packed with innovation, HomePod mini delivers unexpectedly big sound for a speaker of its size. At just 3.3 inches tall, it takes up almost no space but fills the entire room with rich 360-degree audio that sounds amazing from every angle. Add more than one HomePod mini for truly expansive sound.

Boundary-pushing computational audio creates the full, detailed tones of a much larger speaker — and HomePod mini turns it up without missing your voice commands.

HomePod mini is designed to fit anywhere in the house. Its elegant shape is wrapped in a perfectly seamless mesh fabric that's virtually transparent to the sound passing through it. A backlit touch surface on the top provides quick control.
