Fractal Design	

Meshify strikes an aggressive pose in the Fractal Design lineup with unparalleled cooling performance and a defiant new look. Like black diamond facets, the angular asymmetry of the Meshify C carves a space uniquely its own as a new force in high-airflow design.; An open ATX layout with intelligent space utilization creates an unrestricted airflow path from the mesh front intakes directly through key components to exhaust, ensuring heat is never an issue. The Meshify C has a remarkably compact footprint with the high-end component support of a larger tower, and with seven fan mounts and multi-radiator liquid cooling capability, it has the cooling capacity to match.

When performance is top priority and compromise is not an option, Meshify has you covered in style.
