AXIS Camera Station S1116 Recorder

AXIS Camera Station S1116 Recorder is an out-of-the-box, ready-to-use recording solution designed to deliver reliable high-definition surveillance. Available as both a standalone workstation in mini tower form factor for office environments, as well as a rack server for server room installations, this recorder has a storage capacity of up to 24 TB. This easy-to-install solution includes AXIS Camera Station licences for mid-sized installations, so you have everything you need to help ensure every customer installation is trouble-free. From manufacturing facilities to schools and retail, AXIS Camera Station S1116 Recorder meets the requirements of a wide variety of businesses and industries. It's ideal whenever reliable and secure surveillance is required.

Out-of-the-box, ready-to-use

AXIS Camera Station S1116 Recorder comes with AXIS Camera Station licences and preconfigured software, so out-of-the-box you get seamless and reliable integration to all your Axis network cameras. AXIS Camera Station also allows you to verify system performance at installation, so you can be sure your solution is effective and secure. And with the integrated recording toolbox, you get easy access to a complete end-to-end solution with total control over your entire surveillance system.

Improved performance and reliability

AXIS S1116 provides increased performance and contains a powerful CPU to allow for fast processing of data. The operating system is stored on a Solid-State Drive (SSD) meaning system start-up is fast, and the operating system is safeguarded in the event of failure. Furthermore, with cost-effective, next business day on-site support, and a 2-year extended warranty option, you can depend on Axis first-class quality, reliability and support all the way.

Greater flexibility to meet your needs

AXIS Camera Station S1116 Recorder comes with more storage flexibility, allowing you to customize your system storage to meet your specific requirements. It allows you to add extra hard disks to both the standalone workstation (up to 16 TB total capacity) and the rack server (up to 24 TB total capacity). This solution is also validated to support as many as 16 additional camera licences, so you can easily expand your system as it grows.

AXIS Site Designer

Makes it easy to design and install your system and export all configurations to AXIS Camera Station to eliminate installation mistakes.
