

Thermaltake AC-062-OO6NAN-A1 computer case part

Artikel	21295089
Herstellernummer	AC-062-OO6NAN-A1
EAN	4713227533744
Thermaltake	

LCD Panel Kit Snow is an exclusive expansion accessory for the Tower 500 chassis. With its 3.9" LCD display, users can use the TT RGB Plus 2.0 software to gain full control of performance monitoring and personalized effects. Additionally, the LCD Panel Kit Snow can be paired with other Thermaltake Ultra series products, providing the best LCD visual experience.

Perfectly Compatible with The Tower 500 Chassis

LCD Panel Kit Snow is an exclusive accessory for the Tower 500 chassis. Fully fitted front panel design provides easy installation. Users can quickly install the device and control it through the TT RGB Plus 2.0 software by connecting the cable to the motherboard.

Personalize Your LCD Display

Through the TT RGB Plus 2.0, the 3.9" LCD display presents real-time information and plays JPG and GIF files with 128*480 resolution. What's more is users can even show the time and weather information on the display, bringing great visual aesthetics and highly customizable functions to your Tower 500 chassis.

Fully Customizable with TT RGB Plus 2.0

Monitor frequency and real-time temperature directly from the 3.9" LCD display, and upload any images or GIFs to add extra flair with the TT RGB Plus 2.0 software.

Unite Your LCD Display

LCD Panel Kit Snow can be easily paired with other Thermaltake Ultra series components and create interaction among the LCD panels through the TT RGB Plus 2.0 software. Users can customize all the monitors in their Tower 500 chassis according to their own preferences.

TT RGB PLUS 2.0 Software

The new version of Thermaltake's TT RGB PLUS patented software, providing more lighting effects and PC monitoring functions.
