Security		
ESET HOME Platform (Update)	x	-
Protection against viruses, phishing, spam, malware and ransomware	x	Protection against viruses, phishing, spam, malware and ransomware secures your device against online threats of all kinds and prevents malware from spreading to other devices. Blocks ransomware that tries to encrypt your system and data and then demands a ransom to decrypt it. Protects you and your personal data from fake or manipulated websites and keeps unwanted emails out of your inbox
Firewall (Update)	x	The firewall prevents unauthorized access to your system and protects you from data theft.
Protection against network attacks	x	In addition to the firewall, network attack protection protects you from malicious network traffic and blocks threats based on dangerous communication patterns.
Secure home network	x	The secure home network allows you to check your home Wi-Fi router and smart devices in the network for vulnerabilities such as outdated firmware or weak passwords and offers various options for troubleshooting.
Theft protection (Anti-Theft)	x	Anti-theft protection locates and protects your missing device so that you retain full control of your data even in the event of theft or loss.
Webcam protection	x	Webcam protection checks all processes and applications running on the computer to prevent unauthorized access to your webcam.
Childproof lock	x	Parental controls allow you to categorize and block websites according to age.
Security report	x	If required, the security report provides a monthly overview of detected threats, blocked websites, intercepted spam mails and blocked webcam access.
Secure banking & surfing	x	Secure banking & surfing protects you and your data thanks to a secure browser when banking and shopping online and on all other websites.
Performance		
Low system load	x	The low system load enables optimum performance and protects your hardware.
Gamer mode	x	Gamer mode improves the performance potential of your device when playing games and running full-screen applications (including videos and presentations).
Plug-in: Browser protection & privacy (NEW)		
Secure search	x	The secure search scans Google search results and linked websites and evaluates whether they are secure or not.
Browser cleanup	x	Browser cleanup removes private data from the browser either on demand or in regular cycles.

System requirements	
Operating system	Microsoft
	Windows 10 and higher
	Android
	Android 6 and higher(ESET Mobile Security), API Level 31
	Android TV 9 and higher(ESET Smart TV Security), API Level 28
