G DATA

447679  
B1003ESD12/25

With the G DATA endpoint security solutions you protect your IT infrastructure from viruses, espionage attacks and other dangers. Our software includes, besides signature based protection features proactive technologies, which identify and remove even the latest malware.

Benefit from a variety of advantages, that come with modern networks: Keep control over private devices that employees use on your network and allow a secure remote access to company resources.

Our solutions Antivirus Business, Client Security Business and Endpoint Protection Business facilitate the administration of all network components. Add optional modules to your IT software: Features to specifically implement software patches, an email protection on server level and a tool to monitor network components are available on demand. Experience our software with Live Demo.

## Zusammenfassung
