Archer T4U

Dual Band Wi-Fi for Faster Connections

Wireless AC technology means Archer T4U delivers connections that are up to 3x faster than with the previous Wireless N standard. High-speed Wi-Fi (up to 867Mbps over the 5GHz band and 400Mbps over the 2.4GHz band) means Archer T4U is able to support all your online activities, from HD video streaming to lag-free online gaming and web surfing.

High Gain Antennas for a Targeted Signal

With two high gain antennas, Archer T4U greatly extends Wi-Fi range and coverage compared to typical wireless adapter. A stable Wi-Fi network across your home makes for an ideal surfing experience.

Boosted Throughput with MU-MIMO

Thanks to MU-MIMO technology, Archer T4U can provide two simultaneous data streams, improving the throughput and efficiency of the entire network when working with a compatible MU-MIMO router.

USB 3.0 for Superior Transfer Speeds

Experience blazing-fast data transfers of up to 4.8Gbps with USB 3.0 — the latest USB connectivity standard. USB 3.0 transfers data up to 10x faster than USB 2.0 and is also backwards compatible with USB 2.0. Combined with 802.11ac Wi-Fi, USB 3.0 makes Archer T4U ideal for HD streaming, online gaming and large file downloads.
