Modern Green Cell batteries

These are rechargeable batteries that can be used in the same way as AA disposable batteries. The difference is that they can be recharged, because of that the costs of using many home devices reduces in comparison to costs of powering by traditional batteries. They are characterized by a high, real capacity - 2600mAh, which provides longer battery life comparing to disposable batteries.

High durability and work safety

The use of modern materials and advanced production technology significantly increases the durability of batteries. Green Cell batteries provide up to 3 years of trouble-free operation even under heavy loads, and moreover, they retain 85% of the stored energy even after 12 months of storage. They are also adapted to work in extreme temperatures from -20 to 60 ° C with high efficiency!

Ready for immediate action

Green Cell batteries are supplied charged so you can use them immediately after taking them out of the box. They do not need to be charged in advance. This prevents degradation of the battery and loss of capacity. They are compatible with many devices, such as:

- ? Remote controls for TVs and audio devices,
- ? wireless mouse and keyboards,
- ? cameras and flashing lights,
- ? Xbox pads
- ? home medical devices, e.g. blood pressure monitors,
- ? clocks, radios, thermostats, scales,
- ? flashlights and bicycle lamps,
- ? toys.

Change the future of our planet by changing your batteries

Every year we use more than 40 billion disposable batteries worldwide, which often get disposed directly to the environment. Green Cell batteries guarantee up to 3 years of intensive use, which is equivalent to the consumption of dozens of traditional AA batteries! With Green Cell batteries, you can significantly reduce waste and help protect the environment!

Green Cell GR01, Rechargeable battery, AA, Nickel-Metal Hydride (NiMH), 1.2 V, 4 pc(s), 2600 mAh

Green Cell GR01. Battery type: Rechargeable battery, Battery size(s): AA, Battery technology: Nickel-Metal Hydride (NiMH). Height: 50.5 mm, Diameter: 1.45 cm

Merkmale

Weight & dimensions		Battery	
		Battery type	Rechargeable battery
		Battery size(s)	AA
		Battery technology	Nickel-Metal Hydride (NiMH)
		Battery voltage	1.2 V
		Battery capacity	2600 mAh
		Product colour	Black, Green
		Number of batteries included	4 pc(s)
Height	50.5 mm		
Diameter	1.45 cm		

Preisänderungen und Irrtümer vorbehalten. Alle Produkte solange der Vorrat reicht.
