Original Green Cell Ni-Mh AAA battery with the capacity of 950mAh and a voltage of 1.2V

AAA Green Cell batteries maintain their high performance over a long period of time and are capable of operating over a wide temperature range from -20 to 60 °C!

Thanks to the use of modern materials and advanced production technology, their use is completely safe for you and your devices.

Green Cell batteries are compatible with all chargers designed to charge AAA batteries.

Modern Green Cell batteries

These are rechargeable batteries that can be used in the same way as AAA disposable batteries. The difference is that they can be recharged, because of that the costs of using many home devices reduces in comparison to costs of powering by traditional batteries. They are characterized by a high, real capacity - 950mAh, which provides longer battery life comparing to disposable batteries.

High durability and work safety

The use of modern materials and advanced production technology significantly increases the durability of batteries. Green Cell batteries provide up to 3 years of trouble-free operation even under heavy loads, and moreover, they retain 85% of the stored energy even after 12 months of storage. They are also adapted to work in extreme temperatures from -20 to 60 °C with high efficiency!

Ready for immediate action

Green Cell batteries are supplied charged so you can use them immediately after taking them out of the box. They do not need to be charged in advance. This prevents degradation of the battery and loss of capacity. They are compatible with many devices, such as:

- ? Remote controls for TVs and audio devices,
- ? wireless mouse and keyboards,
- ? cameras and flashing lights,
- ? Xbox pads
- ? home medical devices, e.g. blood pressure monitors,
- ? clocks, radios, thermostats, scales,
- ? flashlights and bicycle lamps,
- ? toys.

Change the future of our planet by changing your batteries

Every year we use more than 40 billion disposable batteries worldwide, which often get disposed directly to the environment. Green Cell batteries guarantee up to 3 years of intensive use, which is equivalent to the consumption of dozens of traditional AAA batteries! With Green Cell batteries, you can significantly reduce waste and help protect the environment!

Green Cell GR03, Rechargeable battery, AAA, Nickel-Metal Hydride (NiMH), 1.2 V, 4 pc(s), 950 mAh

Green Cell GR03. Battery type: Rechargeable battery, Battery size(s): AAA, Battery technology: Nickel-Metal Hydride (NiMH). Package type: Blister

Merkmale

Battery		
Operational conditions	Battery type	Rechargeable battery
	Battery size(s)	AAA
Packaging data	Battery technology	Nickel-Metal Hydride (NiMH)
	Battery voltage	1.2 V
	Battery capacity	950 mAh
	Product colour	Black, Green
	Number of batteries included	4 pc(s)
	Package type	Blister

Preisänderungen und Irrtümer vorbehalten. Alle Produkte solange der Vorrat reicht.
