

LANCOM WLC AP Upgrade +25 Option

Artikel	831402
Herstellernummer	61631
EAN	4044144616310
LANCOM Systems	

LANCOM Option WLC Upgrade

Upgrade of manageable WLAN devices

The WLC Upgrade Option enables you to increase the number of access points and WLAN routers that the controller is able to manage. This is a major advantage for growing networks: There is no need to purchase any additional hardware, and existing WLAN controllers are easily upgraded with additional device licenses.

Advantages

Upgrade of manageable WLAN devices

The LANCOM WLC Upgrade Option enables you to increase the number of access points and WLAN routers that the controller is able to manage. Your network stays optimally scalable—without additional hardware components.

Easy upgrades

The LANCOM software options turn a simple network into a customized and cost-efficient solution that meets your individual needs. Simply install them on your existing hardware and you upgrade your network with the desired feature. The advantage: No additional hardware components are required. The costs and the administration overhead of the entire network are reduced. Genuine added value comes in terms of the system's future viability, because the options transform a network into a customized and scalable networking solution.
